

The Safety Association for Canada's
Upstream Oil and Gas Industry

CERTIFIED ICE SAFETY & TRAINING

Safety is a Core Value at NOR-EX and our company is committed to maintaining and driving high standards and it is part of our Mission to improve the safety for clients operating on ice.

NOR-EX and ENFORM—the safety association for Canada's upstream oil and gas industry—have collaborated to develop a Working Safely on Ice course based on Alberta's Best Practice for Building and Working Safely on Ice. The ½ day entry-level course is meant for workers who build or work on lake and river ice covers. Participants receive a certificate after successfully completing the course.

ENFORM TRAINING LOCATIONS

NOR-EX will deliver certified Ice Safety Training at ENFORM LOCATIONS in western Canada as described and offered in their annual course guide: www.enform.ca/training

CERTIFIED TRAINING AT YOUR LOCATION

NOR-EX will offer customized training courses at the times and locations to best meet the training and certification needs of our clients. The flexibility to train your team on your schedule and your site will reduce travel costs and enable a larger cross section of the team to obtain certification.

ADVANCED ICE SAFETY TRAINING FOR SUPERVISORS

NOR-EX also offers customized courses providing in-depth safety training for supervisors and project managers. The Level 2 Safety Training for supervisors covers specific safety aspects of ice profiling, ice construction and ice maintenance. It is often held at a client site where field training can be incorporated into the content. The Level 3 Project Risk Assessment is a customized program in developing a project specific risk assessment and quality assurance framework to identify, control and mitigate hazards associated with ice construction and operations.

REGISTRATION

Please email info@norexice.com or call 1-250-299-6668 to explore the best possible ice safety training opportunities and course curriculum to satisfy the unique needs of your organization.

At NOR-EX, we have adopted a risk management framework aimed at improving our clients safe operations in ice. We offer a variety of certified training services and training materials in the following areas:

- Hazard Awareness
- Ice Safety Training (Worker, Crew, Project)
- Safe Operating Procedures for individuals and crews
- Development of Safety Orientation and Training Materials
- Field Level Hazard Assessments for Operations on Ice
- Efficient and Safe Ice Construction Practices

Our first-hand experience working on ice has demonstrated the effectiveness of providing ice safety training to ice road builders and users on the hazards of working and operating on ice.

NOR-EX has developed safety training materials for clients in Alberta, NWT, Ontario and Saskatchewan for clients in mining, oil and gas and transportation.
